

# ETEC2110 – Systems Programming

## Assignment 0 – Help Me Get To Know You

*Due Date: Tuesday, 2 September by the beginning of class (5 points)*

For this assignment you will be creating a PDF file.

I'd suggest using a word-processor and creating a document that includes the sections and data items requested below. If you don't have a word-processor then I'd suggest installing Libreoffice, which is a free open-source alternative to Microsoft Office. Once you've downloaded it you can create a new "libreoffice writer" document and create your document.

To submit the document, export it as a PDF file then upload it to blackboard as your submission to this assignment. To export as PDF you can go to File → Export as → Export as PDF in the menus or simply click on the "PDF export" icon on the tool-bar (it's usually directly to the left of the Print icon).

Your PDF file should include the following items:

1. Name: \_\_\_\_\_
2. Student ID: \_\_\_\_\_
3. Major: \_\_\_\_\_
4. A picture of yourself. This is just so that I can get to know your face and name.
5. Home town: \_\_\_\_\_
6. Describe why you are taking this class:
7. Describe what you hope to learn from this class:

Your PDF file should only be one page long.
